

## Douglas Fruit + Artisan Organics™

The Douglas family grows their entire crop of peaches and nectarines, organically. These 4th generation growers farm summer fruits in the Columbia Basin, where weather conditions are ideal throughout the four seasons. The Douglas brothers are committed to picking summer fruits tree-ripe for maximum flavors. The result is a delightful summer fruit eating experience every time!

A state-of-the-art Unitec packing line brings full automation to defect sorting and bagging of all peaches and nectarines.

## Why AO Summer Fruit?

- Farmed in eastern Washington State where sunny, warm days help fruit grow large and full of sugars
- Cool nights follow allowing trees to rest and bring out the fruit's vibrant hues
- Volcanic soils provide natural nutrients for trees
- Fruit is harvested from small harvest blocks to ensure evenly ripened fruit is picked in its ideal harvest window

Meet Pete, David, John Douglas
